

Wilmington Oct. 25th 1844
My Dear Dr. Gray
I shall be glad
to try a quart can of that glue
and when you have it sent get
them to send also particulars as
to way of using, price in quantity
as well as for the quart, when to
send for it, &c. &c.; and much obli-
ged too although I have just laid
in 25-lbs best Irish glue which I
got at 28 cts per lb. A pound of
this will last three days and do
300 sheets.

I understood now that all
Palmer's collections are to go to Cam-
bridge and that we three here are
to have sets - to 2,304 - you getting set
No. 1. and that we are to remit ^{about} \$50. +
each to Palmer - the ultimate cost

of the ... & ... determined to ...
for their return and value.

Perhaps on the whole we had each
been sent to ... & it ... and
the miles ... on to Dr. P. Let me know
as to this. I will write to Dr. P. at once in
regard to this determination.

So you are thinking of ...
across the water. But I suppose it
will not be until next summer and
we shall know more about it before
then. I should suppose that by the
time you had got fairly into Aster
and Solids you would feel like
going anywhere where they did not
go!

July 1891, J. M. (only).

W.S. Del. Oct. 27 - 1891

Since writing my note I have a
note from Redford in which he ^{9 AM} suggests
that if plants of Palmer's proposed called
in an ... as well as paid for at
New they should have set No. 2. On
this I cordially concur

Will
